DETAILED ACTION

1. Claim 1 is presented for examination, claims 2–30 having been canceled by Preliminary Amendment.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,715,444 and claim 9 of U.S. Patent No. 5,983,219. Although the conflicting claims are not identical, they are not patently distinct from each other because the claim of the present application is broader not specifying "defining a selection criteria" the current claim subsume the specified claim of the patents.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

5. Claims 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Lewak et al. U.S. patent no. 5,544,360.

6. As to claim 1, Lewak et al. teaches a system comprising the steps of: “providing” (col. 6, lines 16-33 and col. 10, lines 10-18); “reading” (col. 10, lines 38-41) inherently the data file must be read for the list of categories to be displayed; “displaying” (col. 10, lines 38-41); “accepting” (col. 10, lines 41-47); “determining the subfamily” (col. 12, lines 32-37); “determining available alternatives” (col. 12, lines 38-42); and “revising” (col. 12, lines 21-29).

Conclusion

7. The prior art cited and included on the attached 892 is not provided as it was provided in at least one of the parent applications.
